How to Answer

Your answer does not have to be perfect. Just answer in complete thoughts and use details from the chapter.

How to structure your answer

A strong answer usually has a few parts. Try these steps:

1. **Answer the question.** Start with one sentence that answers the question directly.
2. **Give an example.** Add a detail or moment from the chapter that shows what you mean.
3. **Explain why.** Tell why it mattered, or how it made you think or feel.
4. **Wrap it up.** Finish with a closing thought, a question, or a prediction.

Why do Jack and Annie need space suits? What would happen without them?

Example answer: They need space suits because there is no air on the moon and it is very cold. Without a suit they could not breathe and they would freeze. The suits also have air tanks so they can breathe for a little while.

How to Answer (continued)

On the moon everything is lighter. How does that change the way Jack and Annie move? What would you try first?

Example answer: On the moon Jack and Annie can take giant bouncy steps and jump really high because there is less gravity. It looks like they are floating. I would try jumping as high as I could, maybe over a rock.

The special things they have found so far all have something in common. Look at the list. What do you notice?

Example answer: So far they have a moonstone, a mango and a mammoth bone. They all start with the letter M, just like Morgan and the medallion. I think the last thing will start with M too.
